**Subject:** RE: Data Priorities

Hey Craig,

GKMSE100 - 110 have prelim results in SADIE and the viewer.

We also updated to the popups to include No Lab Results if we have don't have them.

Question: Do we need to add a column to SADIE on the QC comment whether its prelim or L2 validated?

Thanks

Subject: Data Priorities

1. Support OPS and keep Janine in the loop.
2. Update the viewer with the new graphs from last night. Go ahead and take the others down even before you start developing.
3. Keep processing and validating the data.
4. Where do we stand on those stream segments? Let's make them all yellow for now.
5. Give me an assessment of development costs to fully deploy SADIE in the R6 environment.

Dan Burgo, R1 DATA Team member will be on the ground later today. he will spend about 1/2 time imbedded at Area Command to shepherd the data thing across all 3 regions (the rest of his time he will be EUL in the R8 IMT).
